Experience

Technical Product Manager, Apple Inc. 04/22 – Present

- Direct product vision (+ OKRs), planning, and execution for one of Apple's most critical internal apps
- Manage a mature and at scale product, ensuring release quality while balancing the many business needs
- Champion for users, introduced web analytics and UX Design processes to measure user behavior, design iterative solutions, test, and improve key performance metrics release after release

Consulting Product Manager, (Contract) Various Startups 11/21 – 04/22

- Freelance work with Series A/B startups to evaluate PM function; present recommendations to C Suite

Technical Product Manager, Dell Technologies - Edge 1/21 – 11/21

- **Led UI/UX team through product discovery**, designing and conducting qualitative research
- **Led 15 person engineering team** through technical competitive analysis of edge competitors; architected and stood up end to end applications as PoCs to quickly validate technical capabilities
- Performed M&A analysis and escalated up to CEO on OEM / acquisition of a competing startup
- Set engineering requirements for Edge SaaS product through its lifecycle via PRD, Jira, & Confluence

IoT DevOps Engineer, (Job Rotation) ExxonMobil Industrial IT - IoT Edge Delivery 3/20 – 1/21

- Delivered, automated, scaled, and supported IoT applications and Infrastructure as Code (IaC) using Python, Terraform, Azure Cloud, Openshift to drive efficiencies in a process environment
- Developed APIs and GUI applications to Emerson gateways to improve visibility into system operations, resulting in improved reliability and enabling the capture of **\$10M benefits annually**

Product Manager, ExxonMobil IT Strategy - Digital Ventures 8/18 – 3/20

- **Created an internal start-up** by successfully pitching to internal stakeholders (VCs) for funding
- Led an Agile, multi-disciplinary team of designers, engineers, data scientists, and IoT developers to automate a tedious environmental compliance task and **saved \$13 million dollars a year**
- Wore many hats to take the Computer Vision product from **zero to one** and scaled computer vision as a platform (PaaS), **reducing the lead time of all future AI/ML use cases by 9 months**
- **Grew team from 1 to 20+**, without direct reports, through effective stakeholder management
- Recognized as **Storytelling Trainer**, teaching others to communicate with customer centric mindset

Business Analyst Internship, Capital One Auto Finance – Business Analytics and PM 6/17 – 8/17

- Product Analyst for Credit Policy; Developed skills in SQL and data vis to analyze Big Data sets
- Discovered a change in credit policy that would increase auto loan originations by \$800M and **drive \$21.4M NPV annually** while minimizing portfolio risk and improving customer experience

Undergraduate Teaching Assistant, Intro to Embedded Systems, Intro to Computing 1/16 – 5/18

- Promoted to **Head TA** in 2017 where I managed a team of 14 TAs

Education

The University of Texas at Austin, **Dual Degree** 2014 - 2018

B.S., Electrical and Computer Engineering, Minor: Spanish GPA: 3.64

B.A., Economics, Minor: Mathematics GPA 3.91

Coding Languages: Python, C, Assembly, SQL, Java, C++

Certifications: Microsoft Azure Fundamentals, Innovation GIANT
